FRONTEND / FULL STACK DEVELOPER

Software Developer with 2+ years of experience building SaaS platforms, dashboards, ERP systems, and interactive web applications. Specialized in React, Next.js, TypeScript, and modern frontend architectures, with experience collaborating directly with CTOs and startup leadership teams to design, migrate, and scale production systems. Passionate about UI/UX, performance optimization, and creating high-quality user experiences.

PROFESSIONAL EXPERIENCE

Keep Vending USA - NitroBean USA

Junior FullStack Web Developer

Remote, USA

January 2024 – November 2024

- Led the migration of a legacy Angular + Django platform to a modern architecture using Next.js, React, TypeScript and ElysiaJS.
- Designed and implemented new frontend modules, improving maintainability, scalability and overall user experience.
- Collaborated directly with the CTO in planning, research, architecture decisions and execution of the migration strategy.
- Built reusable UI components and modernized workflows following responsive and mobile-first design principles.

Technologies: React, Next.js, TypeScript, TailwindCSS, ElysiaJS, AWS, Git.

Jalo

Frontend Web Developer

Remote, Mexico City, México

June 2024 – September 2024

- Developed an internal dashboard for managing promotional and social content across the platform.
- Designed and optimized frontend modules focused on improving usability and user engagement.
- Developed two browser-based games (Tetris and a semi-3D Racing Game) using React, implementing score tracking and real-time gameplay systems.
- Worked directly with the CTO to define product improvements and frontend architecture decisions.

Technologies: React, JavaScript, TailwindCSS, Supabase, Git.

Tramet (Freelance)

Frontend Web Developer

Remote, Mexico City, México

March 2024 – July 2024

- Developed core modules for a custom ERP platform using React and TypeScript.
- Collaborated with backend engineers to define API contracts, workflows and business requirements.
- Designed responsive interfaces focused on usability and operational efficiency.
- Built reusable components and frontend architecture patterns to accelerate future development.

Technologies: React, TypeScript, REST APIs, Git.

PERSONAL PROJECTS

[ZendaPro](#) (Founder & Developer)

ZendaPro is a freemium appointment booking platform focused on small business and allow them to:

- Designed and developed the complete platform architecture.
- Implemented appointment management workflows, scheduling systems and public booking pages.
- Built real-time notifications using Server-Sent Events (SSE).
- Developed customizable branding features and multi-business support.

Technologies: Vite, React, TypeScript, CloudFlare D1/Workers/R2, Hono, DrizzleORM, TailwindCSS, Git, GitHub.

[BillExpress](#) (Full Stack SaaS Platform)

A web application to manage your personal expenses, income, and finances.

- Designed and developed a personal finance management platform.
- Implemented expense tracking, income monitoring and financial reporting features.
- Built interactive data visualizations and account management functionality.

Technologies: Next.js, React, Zustand, TypeScript, Firebase, TailwindCSS, Git, GitHub.

EDUCATION

UNIVERSITY OF GUANAJUATO

Bachelor of Computer Systems Engineering

To-date active member of *BeeDevelopers*, a student-led tech group focused on developer training and promotion of tech content, hackathons, events, conferences, etc.

**Irapuato-Salamanca,
Guanajuato, México**

2020 - 2025

TECHNICAL SKILLS

Frontend

- React
- Next.js
- TypeScript
- JavaScript
- TailwindCSS
- Material UI

Cloud & DevOps

- AWS
- Cloudflare
- Vercel

Backend

- Node.js
- ElysiaJS
- FastAPI
- Express.js

Databases

- PostgreSQL
- MySQL
- Firebase
- Supabase
- SQLite

Tools

- Git
- GitHub
- Linux
- Postman
- Figma
